

1. What software were we using?
2. How many pages did you create?
3. What colours did you use?
4. Were the colours appropriate for the audience?
5. What is the Master Page?
6. What does Custom Animation do? Any examples?
7. Give me one example of how you could make your web site better?
8. If you were ever stuck on something what should you do?
9. What have you learnt today?

Above questions were used at the end of lesson 2 using a 0's and X's board above.

It was the very first time I had used a plenary session using the above template.

The only drawback to this was that only 9 people could be asked about it during the end of the lesson.

To fix this issue I used whiteboards as suggested by my mentor.
